# Wood Cabinet Information

## Base Cabinet Dimensional Information

Base cabinets are designed on a 32mm high "unit" system to allow maximum flexibility in the selection of drawer and/or cupboard door sizes.

Standing height cabinets (35" high) have an opening 24 "units" high. Sitting height cabinets (30" high) have an opening 20 "units" high. ADA height cabinets (32½" high) have an opening 22 "units" high. What this means is that any combination of drawer and cupboard door heights equaling 24, 22, or 20 units can be used in a base cabinet.

The adjacent tables indicate the inside clearance dimensions of the base cabinet drawers and cupboards shown in this catalog. Simply match the number code shown on the cabinet to the appropriate code in tables.

The dimensions shown in these tables are minimums. They may be slightly larger on some cabinet types and/or styles.

These tables are intended to show drawer and cupboard clearances, not actual construction dimensions. If actual dimensions are required, contact your Kewaunee representative.

# Kemresin Tub Sinks & Drain Troughs

Kemresin® Tub Sinks and Drain Troughs are made from a combination of modified epoxy resins, upgraded for maximum properties with carefully selected curing resins and inert fillers to produce a thermosetting material. They are formed in metal molds to provide one-piece units with covered corners and bottoms pitched to the drain outlet. After being removed from the molds, they are cured at high temperatures for

several hours to complete the chemical reaction, and ensure maximum chemical, impact and thermal shock resistance. Drain outlets are sized for 1/2" sink outlets unless otherwise specified.

Kemresin Drain Troughs are molded with no longitudinal joints. A slope of 1/8" per foot assures complete drainage, and a 7/8" cove radius in the bottom corners is provided for ease of cleaning.

Five trough sections, or any part of them, are available to be cemented together to provide Open End Troughs up to 21' long, Closed End Troughs with an end drain outlet up to 21'-8" long and Closed End Troughs with a center drain outlet up to 42'-8" long. Section TR-4 is provided with a center drain recess for a standard 1/2" sink outlet.

### General Notes:

- Sinks with center drain outlets, except 1011-00, can be furnished with a drain recess sized for a crumb cup strainer or garbage disposal when specified.
- Any sink may be furnished with trough cutout. Specify location and size. (Trough location must be at least 1<sup>1</sup>/<sub>2</sub>" from inside corner and 2" from bottom.)
- Most sinks can be joined together to form multiple tub sinks provided adjoining sides of sinks are the same size. Sinks longer than 30", wider than 24" or deeper than 12" cannot be factory joined, but they can be factory prepared for field assembly. Assemblies of three or more tub sinks should be no longer than 60" overall. For longer assemblies, one factory joint can be made with a second joint prepared for field assembly.

# Kemresin Drop-in Sinks

Kemresin Drop-in Sinks are formed in metal molds to provide a lipped one-piece tub with coved corners and bottoms pitched to the drain outlet. They are made from a combination of modified epoxy resins, upgraded for maximum properties with carefully selected curing resins and inert fillers to produce a thermosetting material.

After being removed from the molds, they are cured at high temperatures for several hours to complete the chemical reaction, and ensure maximum chemical, impact and thermal shock resistance. Drain outlets are sized for 1/2" sink outlets unless otherwise specified.

They are designed to be mounted in Kemresin tops in a specially rabbetted cutout so that no support from below is required.

# Stainless Steel Drop-in Sinks

Seamless die-drawn from nickel bearing type 304, 18-8, 18 gauge stainless steel. Allows easy cleaning and stain resistance. Interior and top surfaces polished to a gleaming finish with a highlighted bowl rim. Corners and bottom turns are radiused 1<sup>3</sup>/<sub>4</sub>". Sinks are thoroughly sound deadened with environmentally safe compounds,

to ensure proper sound insulation and to reduce condensation.

All sinks are self-rimming with stainless steel mounting channels for easy, top mount, snap-in clip installation. Sinks are compatible with any type work-surface material from 3/4" to 2 1/2" thick.

Each sink is center punched to receive

a standard cup strainer. ADA compliant sinks are punched in the center, 4-1/2" from the rear of the bowl for extra clearance.
