Bullium Tunic Hood

Bench Hood with Combination Vertical Rising/Horizontal Sash

Plan of Work Top

Indicate cutouts required by noting cupsink part number or size and/or hole type and size at desired location:

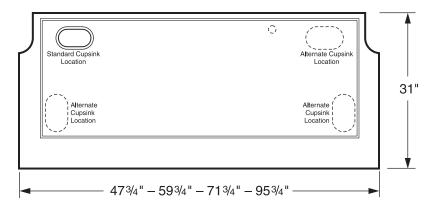

Example:

The example below calls for two 491 cupsink cutouts in the rear along with a 2" dia. vent hole.

For sink or steambath cutout: Sketch in size and location required.

If no cutout is marked, work top will ship with 3"x6" cupsink cutout in left rear corner. If no cutout is required, cross out standard cupsink location. (Cupsink is welded in stainless steel work tops.)

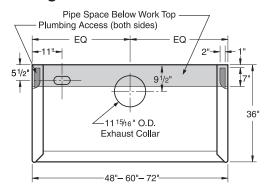

Work Top Material

8'-0" / 96"	88"	28"	22.5"	42"	27"	10.9	870	0.10"	1090	0.10"	1310	0.15"

- * Includes By-Pass opening and 1" opening below deflector vane.
- CFM requirements shown above are for Restricted By-Pass hoods. Consult your Kewaunee representative for CFM requirements for Open By-Pass hoods.
- Static pressures shown are for the pressure drop through the hoods only. The total pressure drop through the hood and the duct system must be calculated to select the proper exhaust fan.

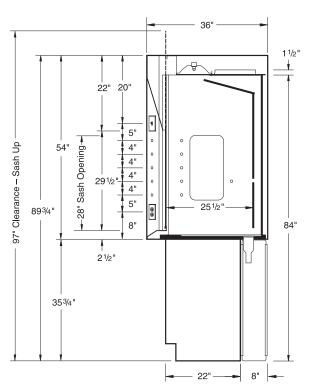

Rough-In for 4' - 5' - 6' Hoods

Rough-In for 8' Hoods
